

# Front End, Back End

Monday, April 17, 2023 9:21 AM

The front end of your site is the part that is exposed to the world, and clients and surfers. It is what you want your public to see. Example: [www.johnabbott.qc.ca](http://www.johnabbott.qc.ca) this is what students/the world sees.

The back end is for "employees" of the company to work on the website. Through this portal, you can/will modify the website. For example: [www.johnabbott.qc.ca/wp-admin](http://www.johnabbott.qc.ca/wp-admin)  
You are entering a "workshop" - the backend is "EMPLOYEES ONLY" of your store!

The image shows the WordPress login interface. At the top center is the WordPress logo, a blue circle with a white 'W'. Below it is a white rectangular box containing the login form. Inside the box, there are two input fields: the first is labeled 'Username or Email Address' and the second is labeled 'Password'. To the right of the password field is an eye icon for toggling visibility. Below the password field is a checkbox labeled 'Remember Me'. To the right of the checkbox is a blue button with the text 'Log In'. Below the white box, there is a link that says 'Lost your password?'. At the bottom of the page, there is a link that says '← Go to test2w6'.

In the backend we create pages, layouts, we put in content, we can do anything!!! Including JavaScript and CSS modifications!

You can reach the back end by adding **/wp-admin** to your front end!
