

Problems? Need Reset?

Monday, April 17, 2023 9:19 AM

You can reset your 000webhost account - but be careful - this could/would erase everything!!!

The screenshot shows the 000webhost website settings page for a user named 'test2w6'. The page is divided into a left sidebar and a main content area. The sidebar contains a 'View Site' link and a 'Website Settings' section with sub-links for General, Statistics, Security, Cron Jobs, Redirects, Logs, and Backup. The main content area has a light blue background and contains several white boxes with settings and actions.

Troubleshoot and Fix Your Website

You can repair your website in case you encounter one of the following problems:

- Incorrect file or directory permissions
- DNS not working
- Trouble accessing your database
- Issues connecting to FTP
- Sendmail and CronJob problems
- Other account or service related difficulties
